There's nothing wrong with
Not being able to choose if you are rather an interactive, digital, web, or graphic designer.

It depends on the day, the mood, and sometimes the weather ...

Hi!

My name is Eva, and I am a french interactive / digital / web / graphic designer.

Passionated by graphic design and digital media since 5 years, I approach this profession with a utopian but assumed way, the way that considers design as a tool in the service of users, above anything else.

I love graphic design when :
- It is a required key for comprehension.
- It solves problems.
- It breaks the frontier between « the useful » and « the artistic ».
- It's popular.
- It makes life easier, fun and colorful !

Behind this eloquent speech, in life, I'm actually :
- **Easy going.**
- **Curious.**
- **Determined.**
- **Talkative.**
- **Always ready for a good joke.**

I'll never judge you on the level of your humour, mine is already really low !
